

MongoDB-backed Resource

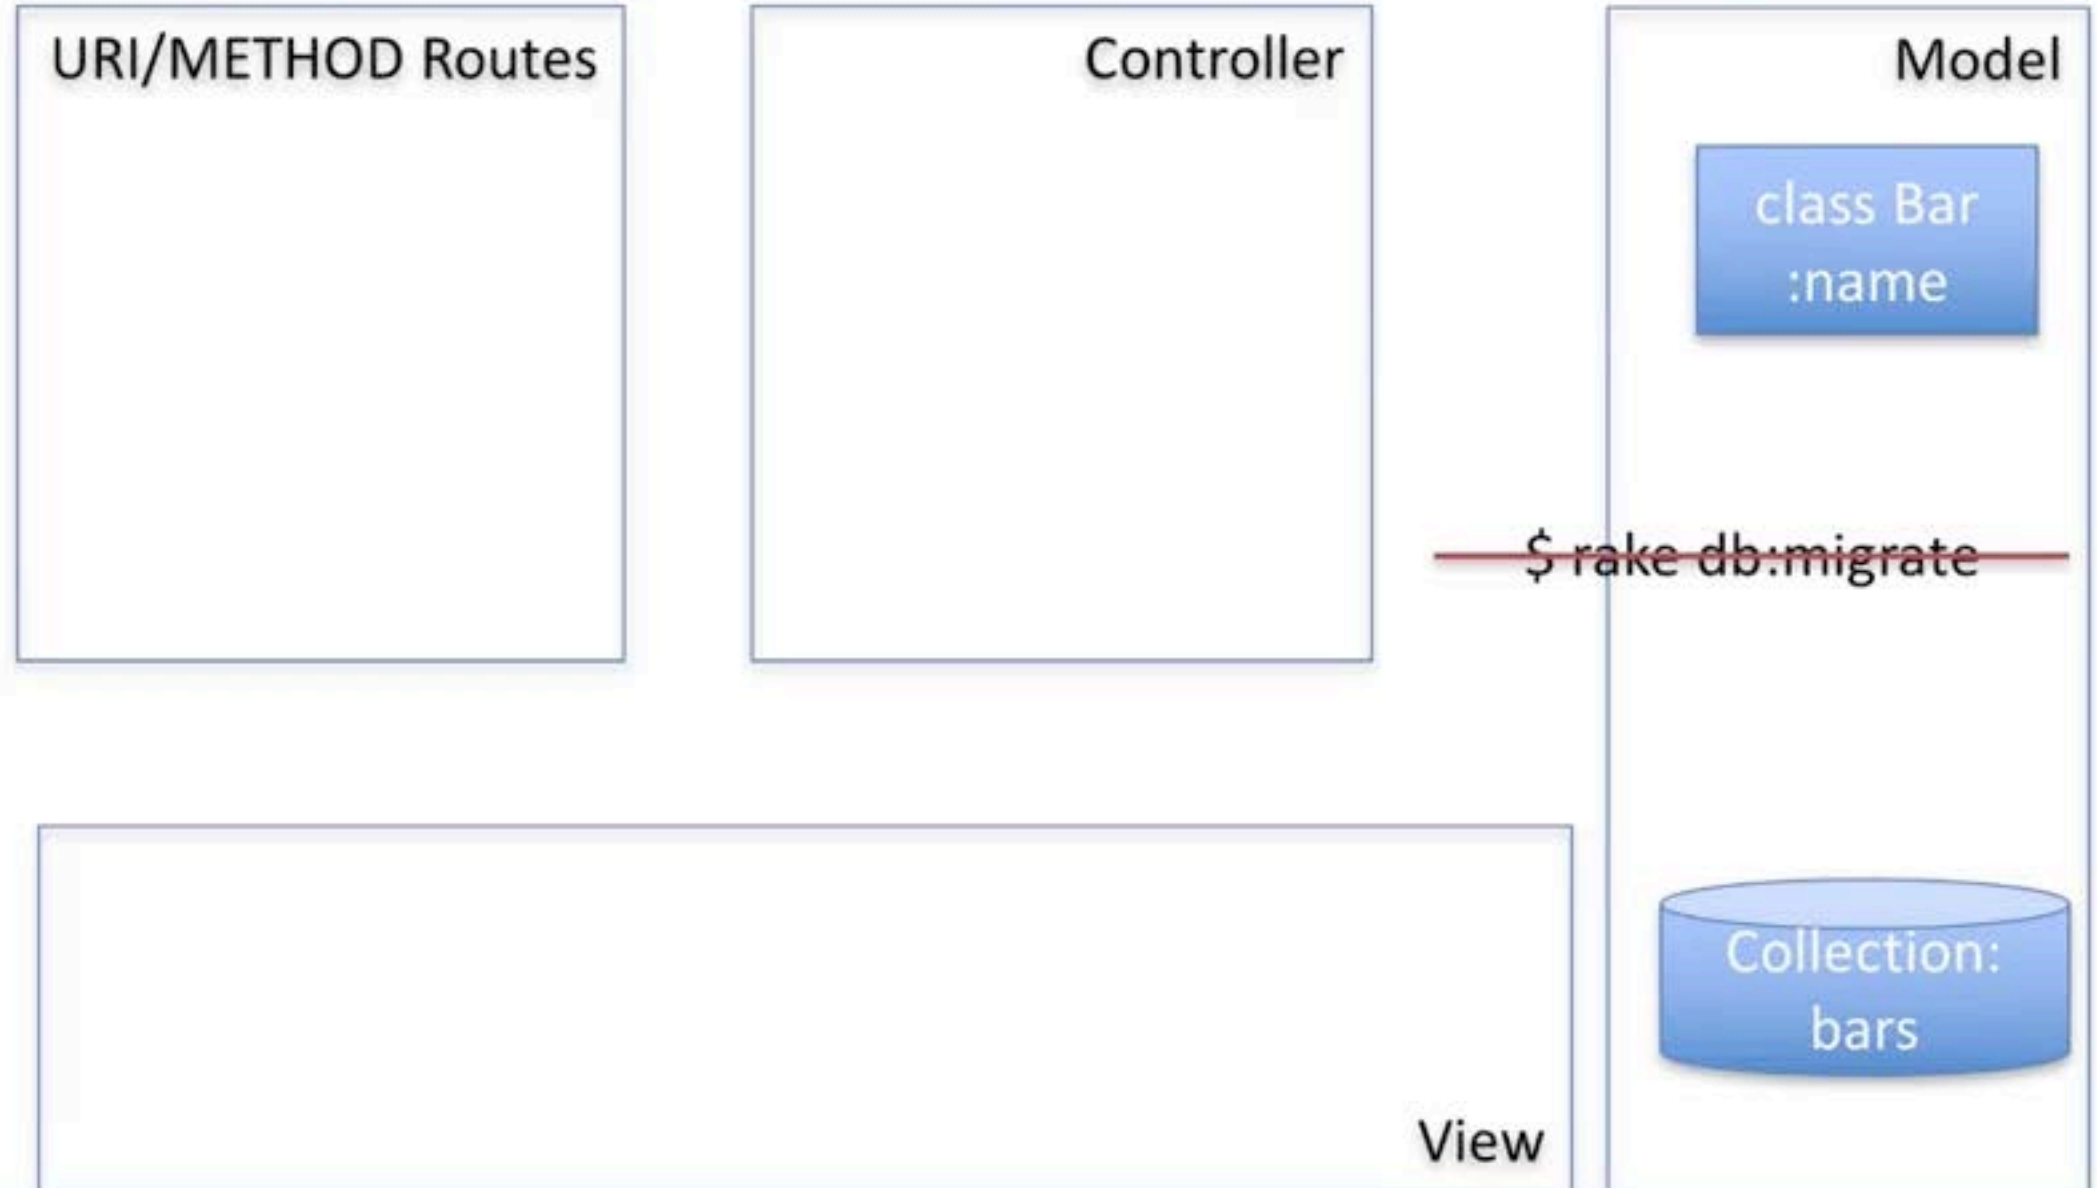

Capstone: Photo Tourist Web Application

In this lecture, we will discuss...

- ✧ Adding Mongoid support to application
- ✧ rails-api g scaffold for Mongoid ORM
- ✧ Adjust JSON ID marshalling

rails-api g scaffold Bar name -orm mongoid

rails-api g scaffold Bar name --orm mongoid

URI/METHOD Routes

```
/api/bars  
GET  
GET :id  
POST  
PUT/PATCH :id  
DELETE :id
```

Controller

```
classBarController  
:index  
:show  
:create  
:update  
:delete
```

Model

```
class Bar  
:name
```

index.json.builder

show.json.builder

_bar.json.builder

View

Collection:
bars

Jamess-MacBook-Pro:capstone_demoapp jim\$

1

```
Jamess-MacBook-Pro:capstone_demoapp jim$ rspec -e MongoDB
```

```
NameError:
  uninitialized constant Bar
# ./spec/requests/api_developments_spec.rb:28:in `block (3 levels) in <top (required)>'
```

2) ApiDevelopments MongoDB-backed expose MongoDB-backed API resource
Got 0 failures and 2 other errors:

2.1) Failure/Error: before(:each) { Bar.delete_all }

```
NameError:
  uninitialized constant Bar
# ./spec/requests/api_developments_spec.rb:27:in `block (3 levels) in <top (required)>'
```

2.2) Failure/Error: after(:each) { Bar.delete_all }

```
NameError:
  uninitialized constant Bar
# ./spec/requests/api_developments_spec.rb:28:in `block (3 levels) in <top (required)>'
```

Finished in 0.0027 seconds (files took 1.4 seconds to load)
2 examples, 2 failures

Failed examples:

```
rspec ./spec/requests/api_developments_spec.rb:30 # ApiDevelopments MongoDB-backed create MongoDB-backed model
rspec ./spec/requests/api_developments_spec.rb:35 # ApiDevelopments MongoDB-backed expose MongoDB-backed API resource
```

# Welcome aboard

You're riding Ruby on Rails!

[About your application's environment](#)

## Getting started

Here's how to get rolling:

1. Use `bin/rails generate` to create your models and controllers

To see all available options, run it without parameters.

2. Set up a root route to replace this page

You're seeing this page because you're running in development mode and you haven't set a root route yet.

Routes are set up in `config/routes.rb`.

3. Configure your database

If you're not using SQLite (the default), edit `config/database.yml` with your username and password.

# Summary

- ✧ Integrated MongoDB into application using Mongoid
- ✧ Used scaffold generator to build skeletal resource
- ✧ Updated the marshalling behavior of the JSON view

## What's Next?

- ✧ Regression Testing
